Methode’s CTI Server Wall Mount Enclosure is designed to allow the mounting of servers while reducing the open space normally required to install the equipment. The Server Wall Mount is mounted across three studs, providing the necessary strength to hold heavy servers.

The Server Wall Mount Enclosure has a weight capacity of 350 lbs.

ME SERVER WALL MOUNT ENCLOSURE

Construction
- Two mesh side doors to access front and rear of equipment
- Removable, locking front panel
- Mounting holes to mount across three wall studs

Cable Management
- 1 – 3” conduit knockouts on top and bottom of mount
- 1 – 3” conduit knockouts on rear of mount
- A variety of 19” cable organizers (optional)

Cooling and Power
- Knockouts on top and bottom to accept fan assembly
- Mesh sides to allow natural airflow
- 19” rack mount power strips (optional)

For more information on accessories for this product, please contact your Methode/CTI representative.
The Server Wall Mount Enclosure is provided standard with mesh sides and a solid removable front panel. Should your needs require a custom version of the standard Server Wall Mount Enclosure platform, please contact your Methode Electronics representative. We can develop a custom solution to meet your specific requirements. (Extended lead times on custom product configurations may apply.)
